ROBOTIC PROCESS AUTOMATION

Robotic process automation (RPA) is the use of software with artificial intelligence (AI) and machine learning capabilities to handle high-volume, repeatable tasks that previously required humans to perform. These tasks can include queries, calculations and maintenance of records and transactions.

BENEFITS OF RPA

- Efficiency-The RPA is highly efficient as they can work 24/7 for 365 days without getting bored and taking any breaks
- With RPA, the work is performed error-free. Better quality means higher satisfaction rates, which again is good for your company's profitability
- One of the biggest advantages of robotic process automation is the immediate and significant reduction in expenditure it can deliver.
- RPA offers the ability to gather, organize, track, analyze, report on and store valuable data

RPA BIG PICTURE

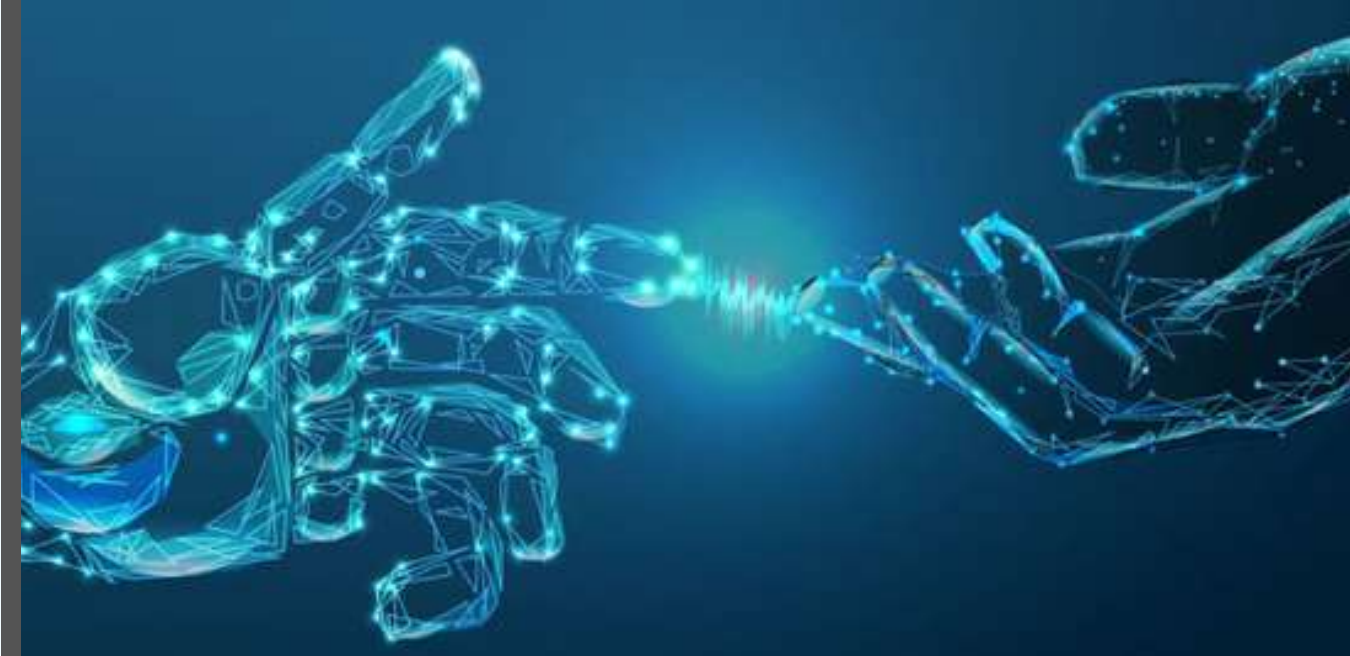

"30-35% RPA is estimated to lead reduction in entry level roles and increase mid level roles" - Everest

"30-40% of the existing business process services are likely to be impacted by RPA" - McKinsey & Company

"85% of firm's 900+ processes is estimated be automated by 2025" - Gartner

BATCHES CONDUCTED AT:

THIRUVANANTHAPURAM

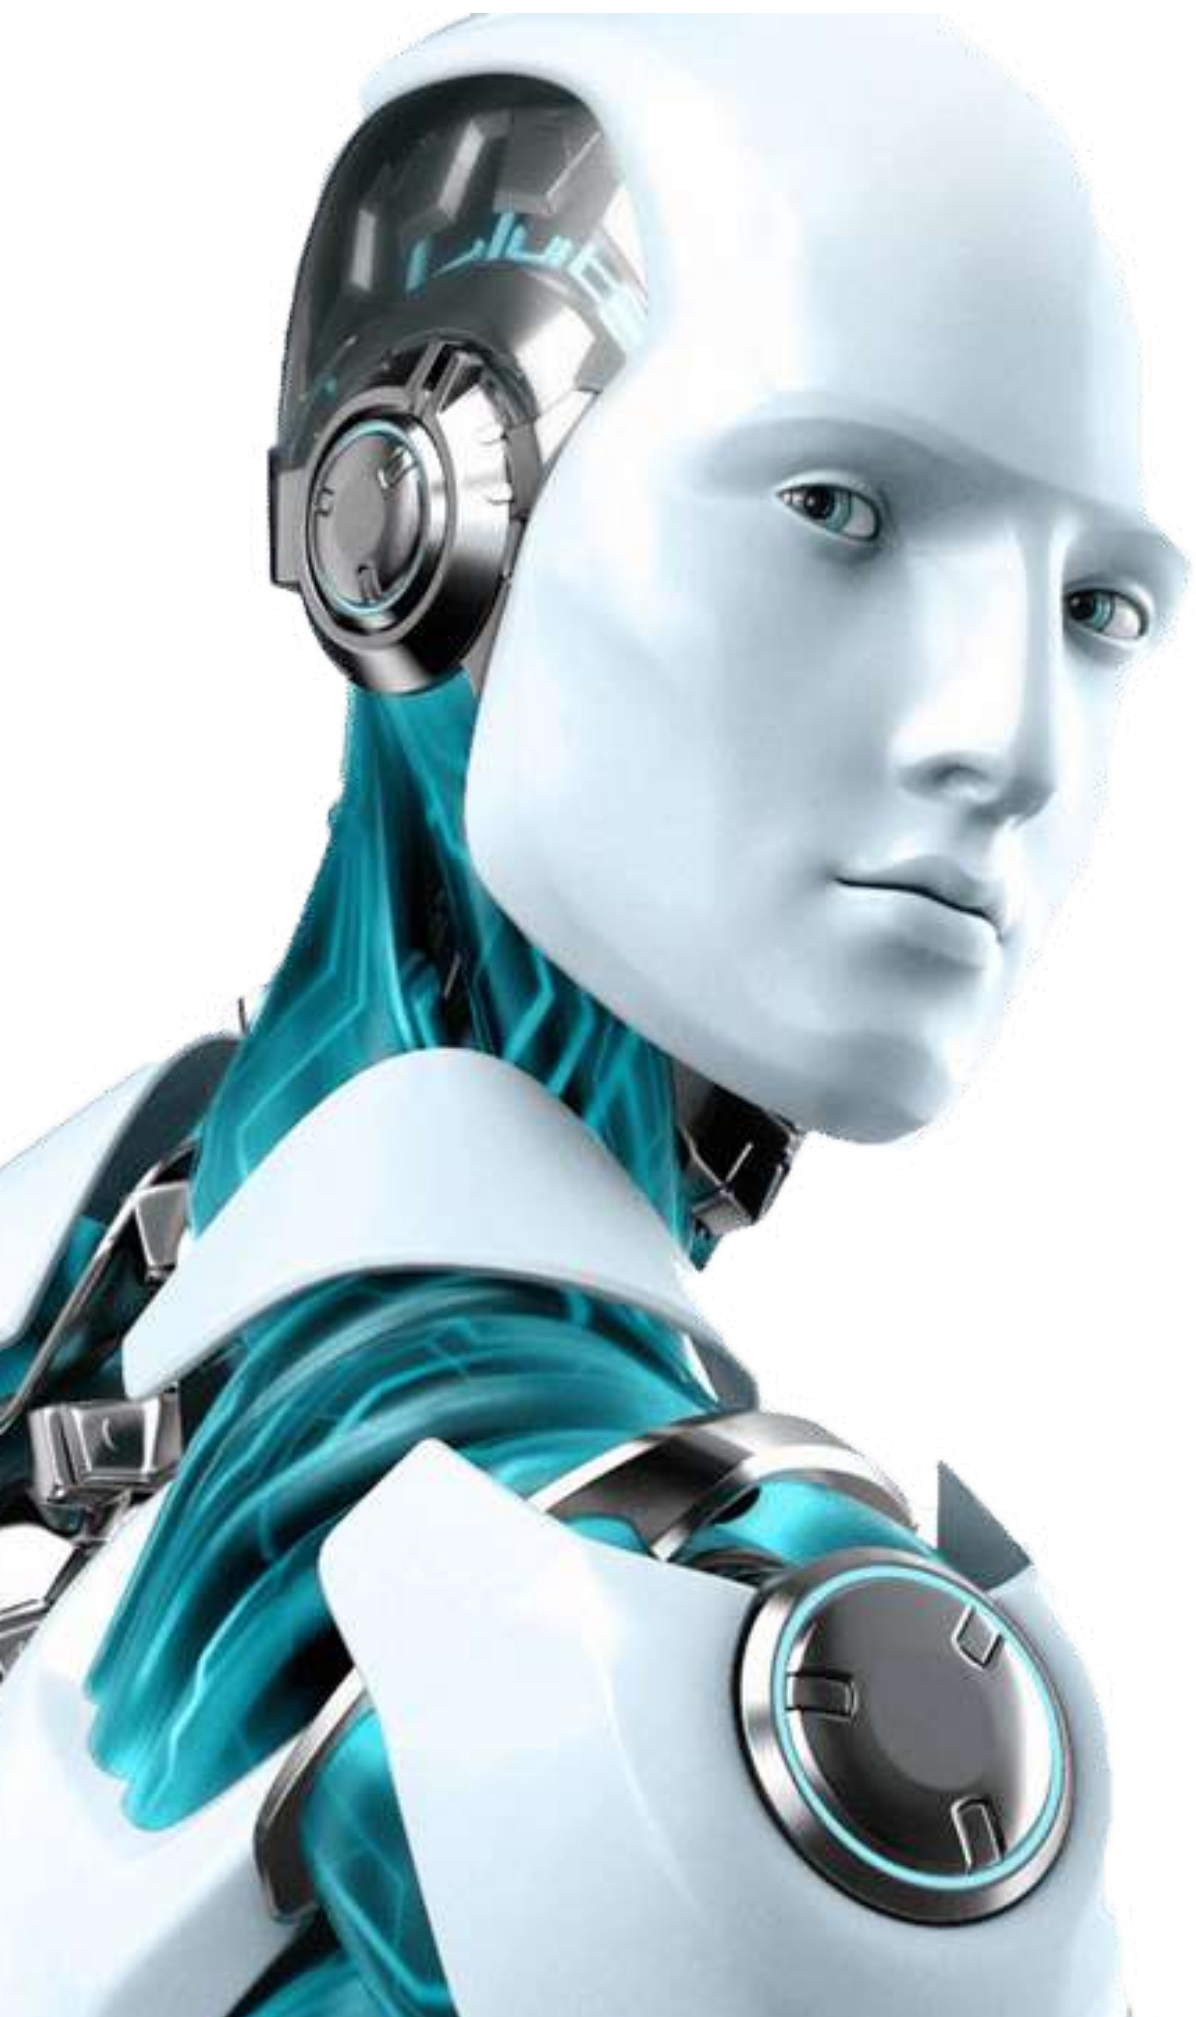

ELIGIBILITY

- B.Tech -(CS/IT/ECE/EEE)
- B.Sc -(CS)
- BCA
- M.Sc -(CS)
- M.Tech (CS/IT)
- MCA

*Opportunities for
Internship/ Placements by Leading
MNC's such as EY,10xDS, etc. However
we don't assure placements*.*

REGULAR FEES

Rs : 20,000 + GST

RPA TRAINING AGENDA - 175 HRS

- Designing Flowchart
- Basics of C# Programming (Data types , Variables, Operation and Expression
- Control Statements and Looping
- Application Development
- Scope and Accessibility Modifiers
- Strings, Generics, Collection and Array
- Introduction UIPATH
- Variables, Data type and Control Flows
- Data Manipulation
- Recording - Basic and desktop , Web Recording
- Advanced UI Interaction
- Selectors
- Image and Text Automation
- Advanced Citrix Automation
- Excel & Data Tables
- PDF Automation
- E-mail Automation
- Debugging & Exception Handling
- Project Organization
- Orchestrator
- Final Project

CLASSROOM TRAINING : 140 HRS
ONLINE TRAINING : 35 HRS } **175 HRS**
PROJECT : 100 HRS

What our Participants have to say.....

" The RPA course at ICT Trivandrum was an excellent class. The training has opened my eyes to the many possibilities of RPA. The trainers were really very cool and patient and made sure to address all my doubts. Altogether it was a wonderful experience and I could learn UI Path from basic to advanced with real-time practical sessions. The training gives me the skills needed to successfully implement the web automation of EPF registration and return filing process of my firm."

MR. RAJAN VARGHESE
DIRECTOR, INFOSIGN TECHNOLOGIES PVT. LTD.

" I joined ICT 's RPA course hoping to build a basic knowledge of RPA and UiPath general, but I left with vastly more. I had no coding experience whatsoever before I joined. Diyaab sir and Nitha mam helped me a lot to get me to understand the concepts. They have a calm and logical method of teaching that truly connected and inspired me. The teaching method and syllabus gave me the confidence to implement new techniques on assignments on UiPath. I didn't just learn "how" to implement projects on Rpa using UiPath- "what" and "why" also became much clearer."

MR. NITHIN MOORTHY M. A
PLACED @ EY

" It was a great opportunity for learning RPA using the UiPath tool with ICT Academy. The course was taken according to a well-prepared syllabus. I also got the chance to work on industry-level projects during the internship in association with EY. "

MR. MERVIN VARGHESE
PLACED @ EY

" I had a great experience with ICT Academy. I didn't even hear about RPA when I joined ICT. When I called Pradeep sir he had told me to attend the orientation class held at ICT Academy, Koratty. Diyaab sir and Nitha mam taught about Ui Path . Actually, I had no coding experience at all but they helped me in learning RPA with ease"

MR. FEBIN VARGHESE P
PLACED @ EY
